

Case Study: Real-World Visibility Snapshot for Leaps in Learning

The following sample report was prepared for a real local business: Leaps in Learning, a reading tutoring service based in Columbia, CT. It demonstrates how Al-generated results (powered by ChatGPT) and Google's organic rankings can vary significantly — even for the same search phrases.

Key Takeaways:

- Google Organic Ranking Success: Leaps in Learning holds the #1 position on Google for broad searches like "*Reading Tutor CT*".
- Al Visibility Gap: Despite this strong presence on Google, the business does not appear in the top 5 Al-generated results for that same term.
- Hyperlocal Impact:
 - For "*Reading Tutor Columbia CT*", Leaps in Learning is #1 across both Al and Google.
 - For "*Reading Tutor Andover CT*', the AI result is higher than Google's.
 - For "*Reading Tutor Marlborough CT*", the business ranks well on Google, but is absent from Al's top 5.
 - For "*Reading Tutor Glastonbury CT*', the AI result is higher than Google's.

These differences highlight why it's important to monitor how your business is represented not just in traditional search engines like Google, but also in emerging Al-powered tools. As Al adoption grows, your visibility in these tools can shape how potential customers discover you.

AI Visibility Report: Comparing Real-Time AI Search vs. Google Rankings

Powered by ChatGPT + Google SERP Analysis

Generated for: Leaps in Learning

Wondering how your business appears in search results? This report gives you a real-time snapshot of the **top-ranking businesses** for your chosen search phrases — across both AI-powered tools (like ChatGPT) and Google's organic search.

You'll see who's showing up for each keyword, and whether your business makes the cut. It's a fast, clear way to understand your visibility across platforms — and spot opportunities to improve.
